

Components of XXL

XXL roller conveyor systems enable the reliable transport of large load carriers. The conveyor covers a working range of 15 kg to 3.000 kg. The carriers (with disc feet / runners) can be transported efficiently. In addition, the universal transport of various pallets is possible, because the XXL roller conveyor systems from AQS convince with their robust construction, 5 years warranty and are **Made in Germany**.

Benefits of XXL

- Transport from beginning 55 mm Ø plate base
- Transport of large load carriers (with disc feet / runners)
- Universal transport of various pallets
- Working range from 15 kg to 3.000 kg
- Transport of stacked load carriers
- Reduced wear and tear of the rollers due to ball bearings
- Smooth running properties with high throughput frequencies
- Can be moved by hand: 0% inclination
- Change of running directions crosswise/lengthwise at workstations
- Unloading of pallets without accumulation pressure manually/electically
- Inclination from 0% to 4% possible
- Wet or damp areas
- Modular principle
- Robust design

Specification

- Pitch 40 mm, roller: 32.5 mm
- Galvanized IL 150/250/350 mm
- Brake rollers galvanized
- Separation device automatic, foot unlocking or electrical
- Entry guide galvanized
- Stop and roller protection galvanized
- Side guiding with flanged roller

Application

- LIFO / FIFO
- Rack and floor mounting
- Workplace in assembly
- Crosswise/lengthwise transport
- Supermarket
- In and outdoor using
- -30 - +40° Celsius

Service

- Planning and design of the plant
- Maintenance / inspection of the system
- On-site consulting
- Construction 2D/3D
- Customer center
- Sampling and testing
- Training of employees
